

# Darley Dene - Calculation Policy - Multiplication

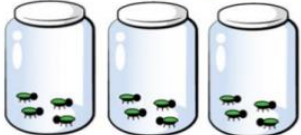

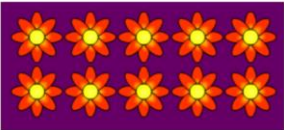

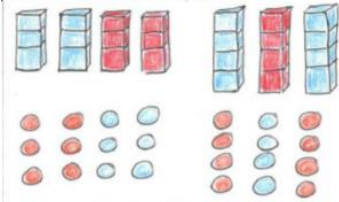

Key language: double, times, multiplied by, the product of, groups of, lots of, equal groups.

<b>Year 1 Multiplication</b>	
<b>Fluency</b>	<b>End of year expectations</b>
<p>Count in twos, fives and tens from different multiples e.g. 6, 8, 10, 12 etc Emphasise number patterns</p> <p>Double numbers and quantities <b>10 x 2 = 20</b> 10 times 2 10 groups of 2 10 lots of 2</p>	<p>0 x 0</p> <ul style="list-style-type: none"> <li>Solve single step practical problems involving multiplication</li> <li>Numbers up to 20</li> <li>Use concrete objects, pictorial representations</li> <li>Double numbers and quantities</li> <li>Make connections between arrays, number patterns and counting in</li> <li>twos, fives and tens</li> </ul>

<b>Objective and strategy</b>	<b>Concrete (build it)</b>	<b>Pictorial (draw it)</b>	<b>Abstract (write it)</b>				
<b>Doubling</b>	<p>Use practical activities using manipulatives including cubes and Numicon to demonstrate doubling</p>  <p>double 4 is 8 <math>4 \times 2 = 8</math></p>	<p>Draw pictures to show how to double numbers</p> <table border="1" style="margin: 0 auto; border-collapse: collapse; text-align: center;"> <tr><td colspan="2">10</td></tr> <tr><td>5</td><td>5</td></tr> </table> <p style="text-align: center;">Double 4 is 8</p> 	10		5	5	<p>Partition a number and then double each part before recombining it back together.</p>  <p style="text-align: center;"><math>20 + 12 = 32</math></p>
10							
5	5						

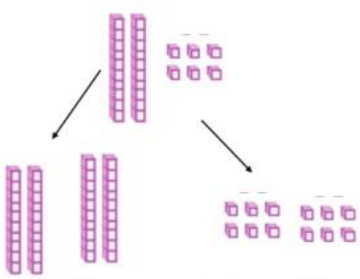

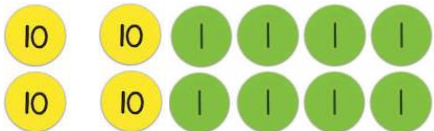

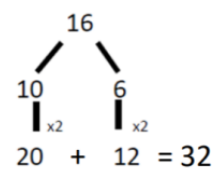

--	--	--	--

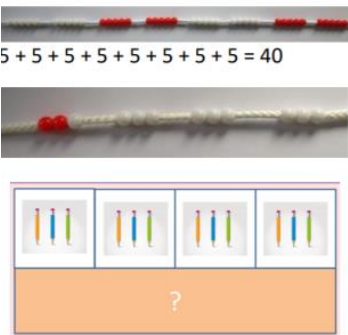

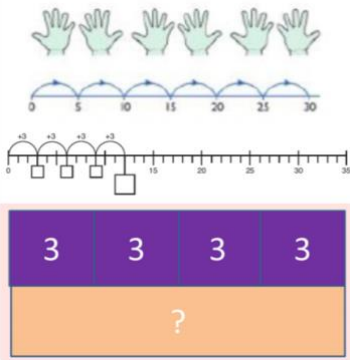

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
<p><b>Counting in multiples</b></p>	<p>Count the groups as children are skip counting, children may use their fingers as they are skip counting</p> 	<p>Children make representations to show counting in multiples.</p> 	<p>Count in multiples of a number aloud. Write sequences with multiples of numbers.</p> <p>2, 4, 6, 8, 10</p> <p>5, 10, 15, 20, 25, 30</p>
<p><b>Making equal groups and counting the total</b></p>	<p>Use manipulatives to create equal groups.</p> 	<p>Draw and make representations</p> 	<p><math>4 \times 2 = 8</math></p> <p><math>2 \times 4 = 8</math></p>
<p><b>Repeated addition</b></p>	<p>Use different manipulatives to add equal groups</p> 	<p>Use pictures including number lines to solve problems</p> <p>There are 3 sweets in one bag. How many sweets are in 5 bags altogether?</p> 	<p>Write addition sentences to describe objects and pictures.</p>  <p><math>2 + 2 + 2 + 2 + 2 = 10</math></p>

	<p>There are 3 equal groups, with 4 in each group.</p> 		
<p><b>Objective and strategy</b></p>	<p><b>Concrete (build it)</b></p>	<p><b>Pictorial (draw it)</b></p>	<p><b>Abstract (write it)</b></p>
<p><b>Understanding arrays</b></p>	<p>Use objects laid out in arrays to find the answers to 2 lots of 5, 3 lots of 2 etc.</p>  	<p>Draw representations of arrays to show understanding</p>  	$3 \times 2 = 6$ $2 \times 5 = 10$

## Year 2 Multiplication

Fluency	End of year expectations
<p>Count in twos, threes, fives from zero and tens from any number e.g. 6, 8, 10, 12 etc</p> <p>Emphasise number patterns</p> <p>Introduction to Multiplication tables.</p> <p>Practise to become fluent in multiplication facts for 2, 5 and 10</p> <p>Solve multiplication problems mentally</p> <p><math>10 = 2 \times 5</math> <math>5 \times 2 = 10</math> <math>2 + 2 + 2 + 2 + 2 = 10</math> <math>10 = 5 + 5</math></p>	<p>Understand multiplication as repeated addition</p> <p>Understand and solve problems involving arrays</p> <p>Calculate mathematical statements for multiplication within the tables and write them using symbols <math>x =</math></p> <p>Ensure children understand that multiplication is commutative (can be done in any order)</p> <p>Understand that multiplication and division are inverse operations</p>

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
<p><b>Doubling</b></p>	<p>Model doubling using dienes and PV counters</p> <p>Double 26 is 52</p> 	<p>Draw pictures and representations to show how to double numbers</p> <p>Double 24 is 48</p> 	<p>Partition a number and then double each part before recombining it back together.</p> 

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
<p><b>Repeated Addition</b></p> <p>(counting in multiples of 2, 3, 4, 5, 10 from 0)</p>	<p>Count the groups as children are skip counting, children may use their fingers as they are skip counting. Use bar models.</p> 	<p>Number lines, counting sticks and bar models should be used to show representation of counting in multiples.</p> 	<p>Write sequences with multiples of numbers.</p> <p>0, 2, 4, 6, 8, 10</p> <p>0, 3, 6, 9, 12, 15</p> <p>0, 5, 10, 15, 20, 25, 30</p>

<p><b>Multiplication is commutative</b></p>	<p>Create arrays using counters, cubes and Numicon</p>  <p>Pupils should understand that an array can represent different equations and that, as multiplication is commutative, the order of the multiplication does not affect the answer.</p> 	<p>Use representations of arrays to show different calculations and explore commutativity.</p> 	$12 = 3 \times 4$ $12 = 4 \times 3$ <p>Use an array to write multiplication sentences and reinforce repeated addition.</p>  $5 + 5 + 5 = 15$ $3 + 3 + 3 + 3 + 3 = 15$ $5 \times 3 = 15$ $3 \times 5 = 15$
<p><b>Using the Inverse</b></p> <p><i>(This should be taught alongside division, so pupils learn how they work alongside each other)</i></p>	<p>Use manipulatives to build understanding of the inverse.</p> $4 \times 3 = 12$ $12 \div 3 = 4$ 	<p>Use pictures and fact family triangles to build understanding.</p> 	<p>Show all 8 related fact family sentences.</p> $2 \times 4 = 8$ $4 \times 2 = 8$ $8 \div 2 = 4$ $8 \div 4 = 2$ $8 = 2 \times 4$ $8 = 4 \times 2$ $2 = 8 \div 4$ $4 = 8 \div 2$

## Year 3 Multiplication

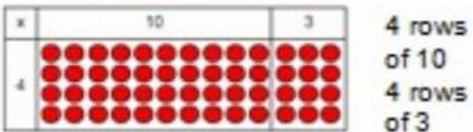

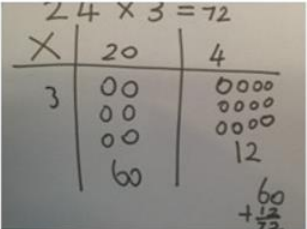

Fluency	End of year expectations
<p>Count from 0 in multiples of 4, 8, 50 and 100</p> <p>Use multiples of 2, 3, 4, 5, 8, 10, 50 and 100</p> <p>Practise mental recall of multiplication tables – 3, 4 and 8x times tables</p> <p>Connect the 2, 4 and 8 times tables using doubling</p> <p>Develop efficient mental methods using commutativity and multiplication facts to derive related facts e.g. <math>4 \times 5 \times 12 = 12 \times 4 \times 5 = 12 \times 20</math></p>	<p><math>TO \times O</math></p> <p>Develop reliable written methods</p> <p>Understand and solve scaling problems</p> <p>Solve problems involving multiplication including correspondence (a close similarity, connection or equivalence)</p>

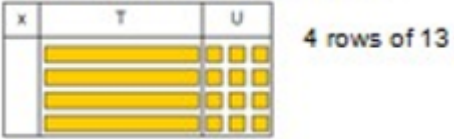

$$4 \times 5 = 20$$

$$5 \times 4 = 20$$

$$20 \div 5 = 4$$

$$20 \div 4 = 5$$

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)						
<p><b>Grid method</b></p>	<p>Show the links with arrays to first introduce the grid method, use counters or place value counters.</p> 	<p>Children can represent their work with place value counters in a way that they understand. They can draw the counters using colours to show different amounts or just use the circles in the different columns to show their thinking as shown below.</p> 	<p>Start with multiplying by one digit numbers and showing the clear addition alongside the grid.</p> <table border="1" data-bbox="1625 634 1835 695"> <tr> <td>x</td> <td>30</td> <td>5</td> </tr> <tr> <td>7</td> <td>210</td> <td>35</td> </tr> </table> <p><math>210 + 35 = 245</math></p>	x	30	5	7	210	35
x	30	5							
7	210	35							

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)						
	<p>Move onto base ten to move towards a more compact method.</p> 	<p>Bar models are used to explore missing numbers</p>	<table border="1" data-bbox="1604 1187 1864 1263"> <tr> <td>x</td> <td>30</td> <td>5</td> </tr> <tr> <td>7</td> <td>210</td> <td>35</td> </tr> </table> <p><math>210 + 35 = 245</math></p>	x	30	5	7	210	35
x	30	5							
7	210	35							

**Grid method**

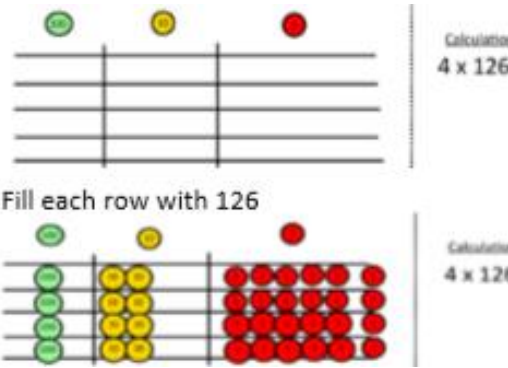

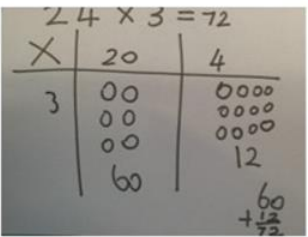

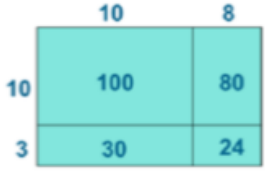

$24 \times 3 = 72$

X	20	4
3	00	0000
	00	0000
	00	0000
	60	12
		60
		$+ \frac{12}{72}$

# Year 4 Multiplication

Fluency	End of year expectations
Count in multiples of 6, 7, 9, 25 and 1000	TO x O HTO x O
Recall and use multiplication facts up to 12 x 12 with increasing fluency	Multiplying three numbers 3 x 2 x 6
Derive multiplication facts with up to three-digits	Solve two-step problems
Recognise and use factor pairs and commutativity	Multiplying by 0 and by 1
Use the distributive law	Develop fluency in short multiplication using formal written layout
Combine knowledge of number facts and rules of arithmetic to solve mental and written calculations e.g. $2 \times 6 \times 5 = 10 \times 6$	Solve problems involving multiplication including using the distributive law, integer scaling problems and harder correspondence problems

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
<p><b>Grid method recap from year 3 for 2 digits x 1 digit</b></p> <p><b>Move to multiplying 3 digit numbers by 1 digit. (year 4 expectation)</b></p>	<p>Use place value counters to show how we are finding groups of a number. We are multiplying by 4 so we need 4 rows</p>  <p>Fill each row with 126</p>	<p>Children can represent their work with place value counters in a way that they understand. They can draw the counters using colours to show different amounts or just use the circles in the different columns to show their thinking</p> 	<p>Multiply by a 2 digit number showing the different rows within the grid method.</p> 

Add up each column, starting with the ones making any exchanges needed

Then you have your answer.

### Column multiplication

Children can continue to be supported by place value counters at the stage of multiplication. This initially done where there is no regrouping.  $321 \times 2 = 642$

It is important at this stage that they always multiply the ones first. The corresponding long multiplication is modelled alongside.

x	300	20	7
4	1200	80	28

Bar modelling and number lines can support learners when solving problems with multiplication alongside the formal written methods.

$$\begin{array}{r}
 327 \\
 \times 4 \\
 \hline
 28 \\
 80 \\
 1200 \\
 \hline
 1308
 \end{array}$$

	3	2	7
x			4
	1	3	0
		2	8

This may lead to a compact method.

## Year 5 Multiplication

Fluency	End of year expectations
<p>Count forwards in steps of powers of 10 from any given number up to 1 000 000</p> <p>Practise and extend use of formal written method of short multiplication</p> <p>Apply all multiplication tables frequently. Commit them to memory and use them confidently to make larger calculations</p> <p>Multiply numbers mentally drawing upon known facts</p>	<p>ThHTO x O ThHTO x TO</p> <p>Identify multiples and factors including finding all factor pairs of a number, and common factors of two numbers</p> <p>Solve problems involving all operations where larger numbers are used</p> <p>Multiply whole numbers and those involving decimals by 10, 100 &amp; 1000</p> <p>Understand and use multiplication and division as inverses including in problems involving missing numbers and balancing equations</p> <p>Solve problems involving multiplication and division including scaling by simple fractions</p> <p>Know and use the vocabulary of prime numbers, prime factors and composite (non-prime)</p> <p>Recognise and square and cube numbers and associated notation</p>

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
<b>Column multiplication</b>	<p>Manipulatives may still be used with the corresponding long multiplication modelled alongside.</p>	<p>Continue to use bar modelling to support</p> 	<p>18 x 3 on the first row (8 x 3 = 24, carrying the 2 for 20, then 1 x 3)</p> <p>18 x 10 on the 2nd row. Show multiplying by 10 by putting zero in the ones column first</p> 

## Year 6 Multiplication

Fluency	End of year expectations
<p>Undertake mental calculations with increasingly large numbers</p> <p>Continue to use all multiplication tables to calculate mathematical statements in order to maintain fluency</p>	<p>Multiply multi-digit numbers up to four-digits by a two-digit whole number</p> <p>Multiply single –digit numbers with up to two-decimal places by whole numbers</p> <p>Identify common factors, common multiples and prime numbers</p> <p>Solve problems including multiplication</p>

$$\begin{array}{r}
 180 \\
 \times 13 \\
 \hline
 540 \\
 1800 \\
 \hline
 2340
 \end{array}$$

<b>Short Multiplication</b>	<b>Long multiplication Whole numbers</b>	<b>Long multiplication Decimal numbers</b>
-----------------------------	--	--

$$\begin{array}{r}
